

Viewing Contacts on Phone

Android

- You can view all your work contacts on your phone in your work profile – contacts
- If you save a contact here select outlook this will sync with your outlook client
- If you save a contact in your outlook it will sync to the work contact location
- You can search work contacts from the personnel side of your phone by going into the phone icon and searching the name.

- Work contacts are not visible on the personnel side of your phone you have to search for them
